THE UNITED STATES DEPARTMENT OF AGRICULTURE says,
under date of February 12, 1930:

"The conditions which favored the Clover Seed crop this year in many States also favored the production of weed seeds so that farmers should be sure of the quality of the seeds they are sowing, particularly as to purity and freedom from weed seeds. 'Above all else the farmer should use seed that will produce a Clover crop — not a weed crop. Clover Seed that is not clean enough for the commercial trade certainly should not be sold to neighbors for reseeding.'"
